### Radon / Lead Paint

Radon: Radon is a common problem in Iowa. It's an invisible gas with no smell that can seep into your home. High levels of radon in your home can cause lung cancer. Find out if your home has high levels of radon using a free radon test kit!

Lead Paint: Lead paint is a common problem in older homes. Paint that is damaged, peeling, or chipping can flake away and turn into dust after it falls on the floor. You can test these areas for lead paint using a free test kit!

Starting February 6th, stop by the RC&D office at 101 E. Greene St. (across from city hall and next to Turner Hall in a big green building) Monday through Friday from 9:00am to 4:00pm

There will be other opportunities to get your free test kit later this year. For more information contact Northeast Iowa RC&D at 563-864-7112 or email [nathan@northeastiowarc.org](mailto:nathan@northeastiowarc.org).
